Biz1 Entries Platform Overview

Biz1 Entries is an enterprise B2B compliance and master record management platform engineered to catalog business customer dossiers, manufacturing specifications, raw material registries, and kosher certification statuses across dynamic operational folders.

- **Customer Dossier & Compliance Telemetry:** Comprehensive customer profile tracking corporate managers, Hebrew business names (שלושת האופים ירכא), contact points, industrial addresses, certification dates, and assigned rabbinical inspectors (הרב יהושע הירש).
- **Custom Category & Schema Definition:** Flexible entry schema generator supporting bilingual English/Hebrew nomenclature, folder categorization, multi-custom fields, team member sharing matrices, and header display toggles.
- **Automated Multi-Channel Execution & Export:** Integrated actions including instant WhatsApp client outreach, live sync telemetry, batch export, and dynamic workflow triggers (Run Automation).

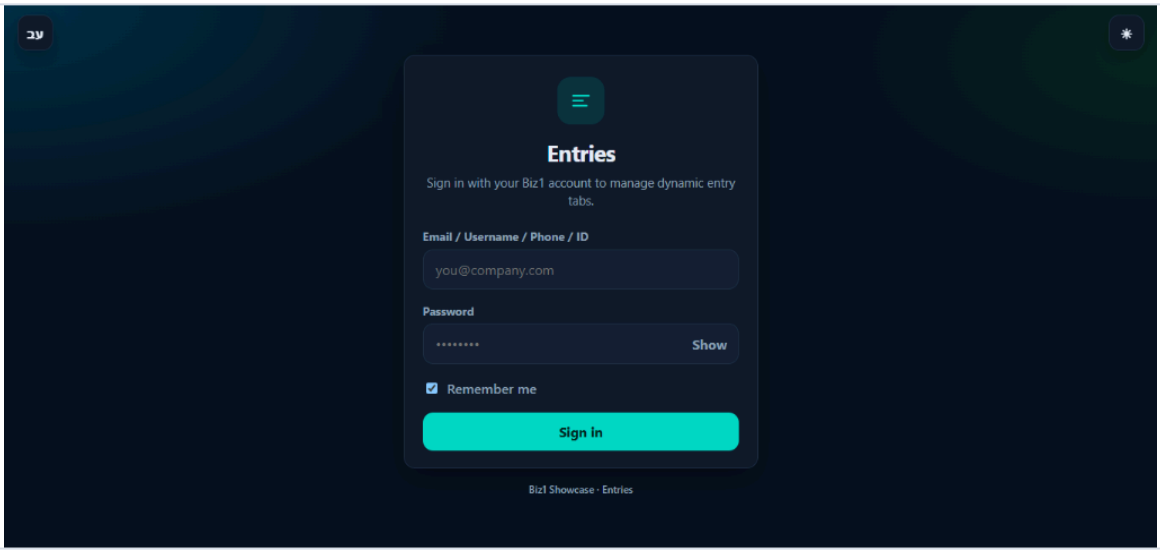
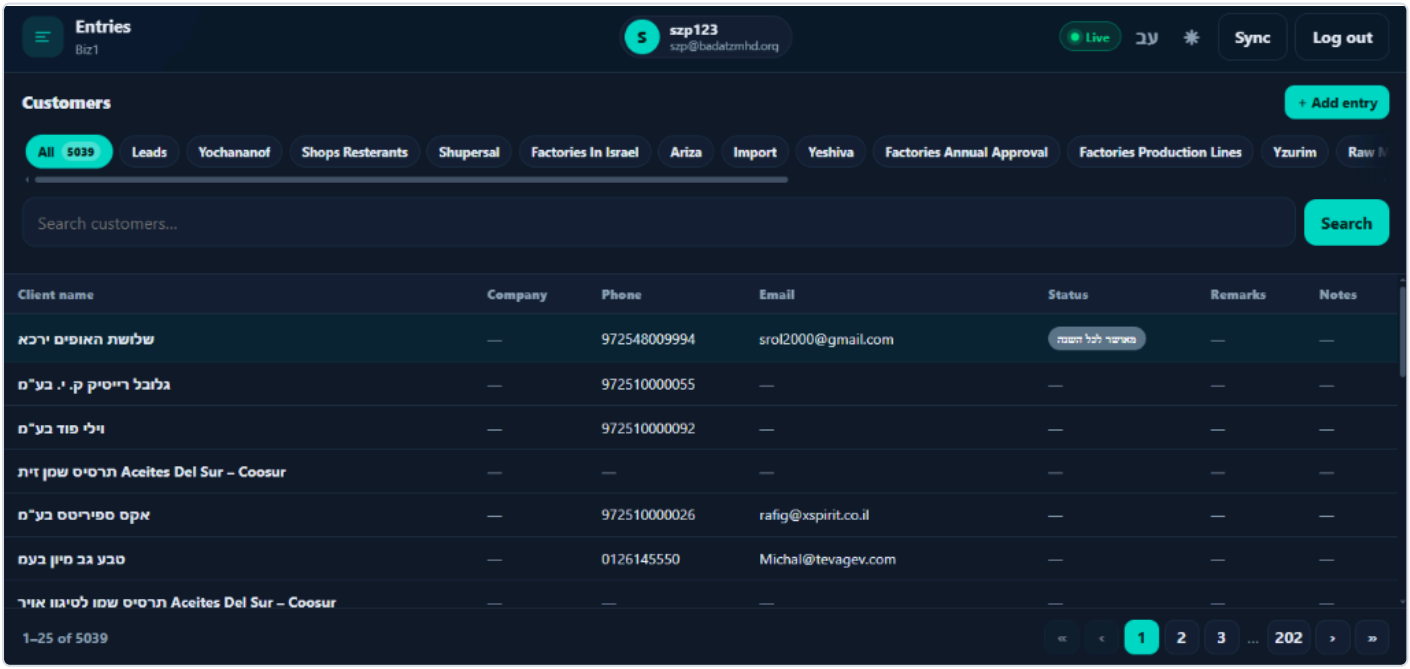
System Access Credentials · Active Test Access

Parameter / Control	Value / Format	Description & Instructions
Login Portal URL	https://apps.biz1.co.il/szp123/szp123/	Direct web access URL to the Biz1 Entries management and registry portal.
Login Username	`szp123`	Valid operator login handle to authenticate into Biz1 Entries.
Login Password	`Hydh3AsEI7` Universal	Common password across all Biz1 platforms; case-sensitive test authentication.
Localization & Role	`Hebrew (עב) · B2B Dark Mode`	Multi-tenant kosher compliance and industrial product catalog manager.

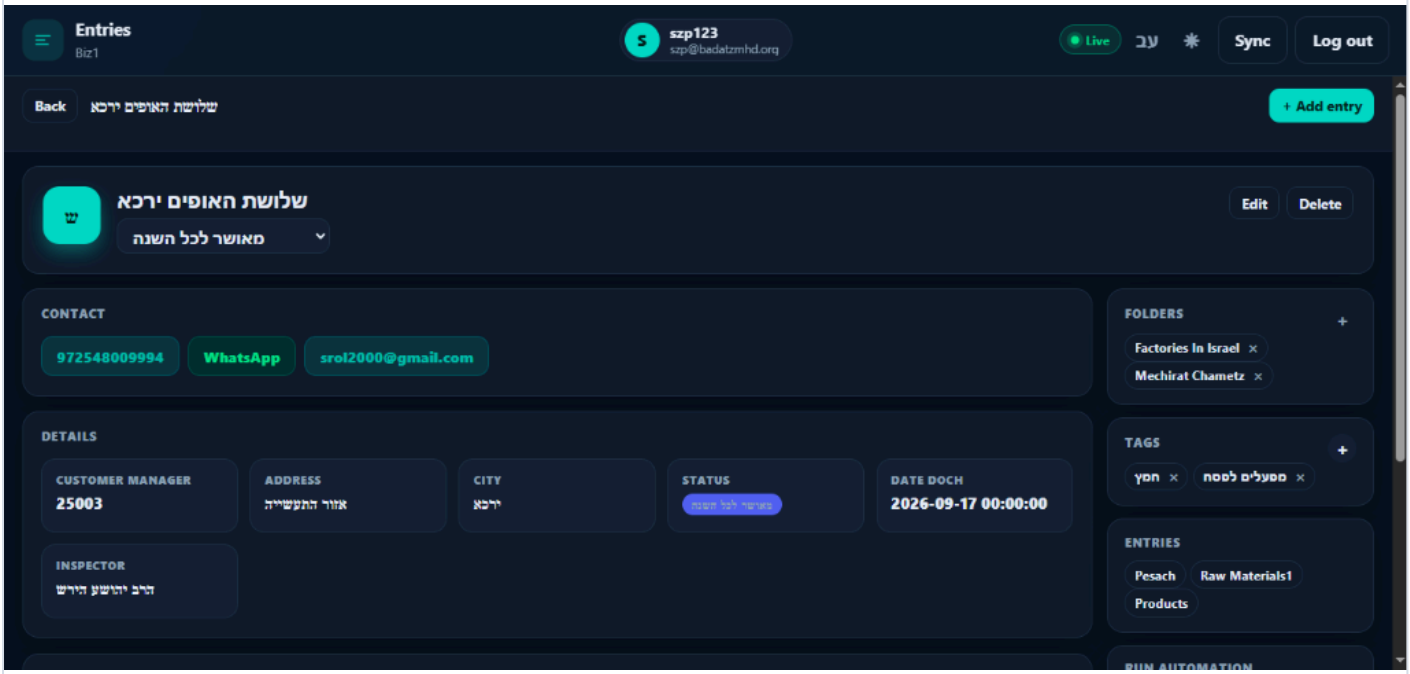




Customer Dossier & Operational Profile Management

COMPLIANCE PROFILE

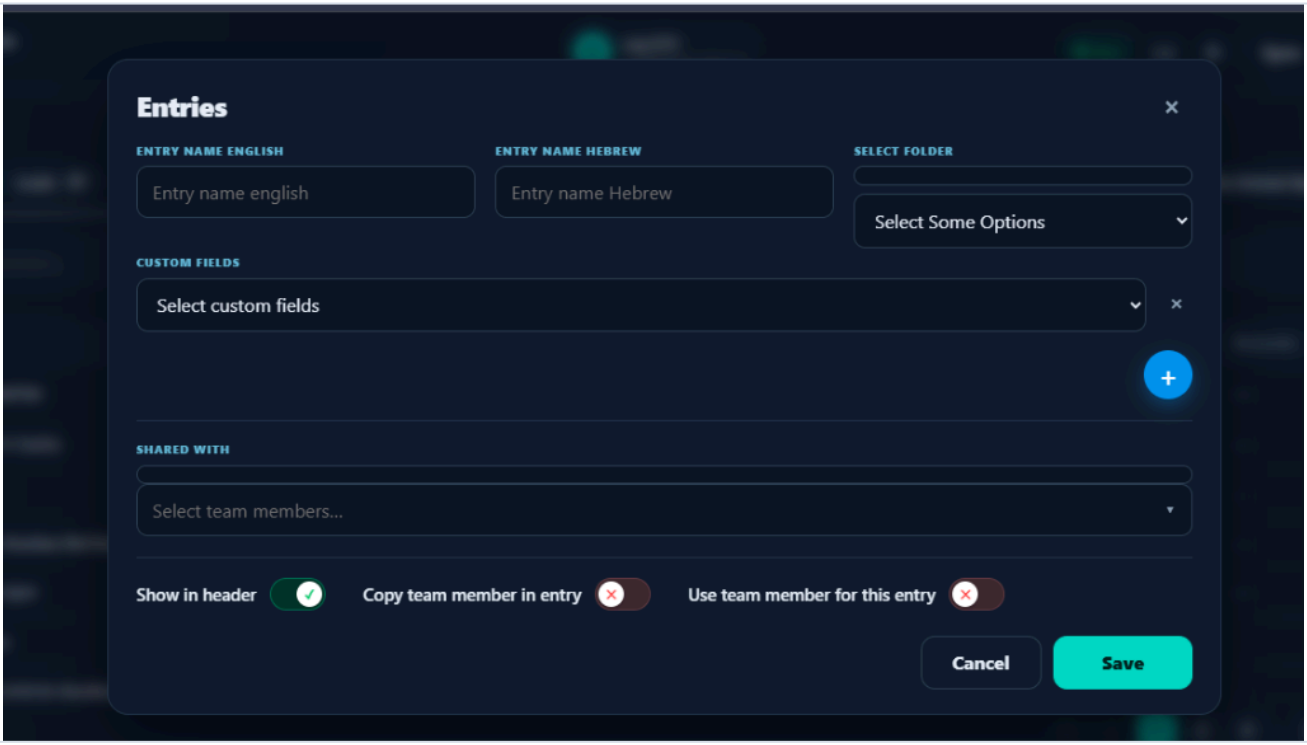
- **Master Client Profile & Contact Hub:** Centralized dossier displaying Hebrew trading name (שלושת האופים ירכא), annual kosher certification badge (מאושר לכל השנה), direct phone (+972 54 800 9994), WhatsApp dispatch link, and contact email.
- **Operational Metadata & Rabbinical Inspection:** Structured audit cards logging Customer Manager ID (25003), industrial zone address, city of operation (ירכא), submission date (2026-09-17), and designated rabbinical inspector (הרב יהושע הירש).
- **Folder & Tag Association Ledger:** Multi-folder categorization (Factories in Israel, Mechirat Chametz) paired with compliance tag pills and sub-entry tabs (Pesach, Raw Materials1, Products).



Dynamic Entry Definition & Permission Studio

SCHEMA STUDIO

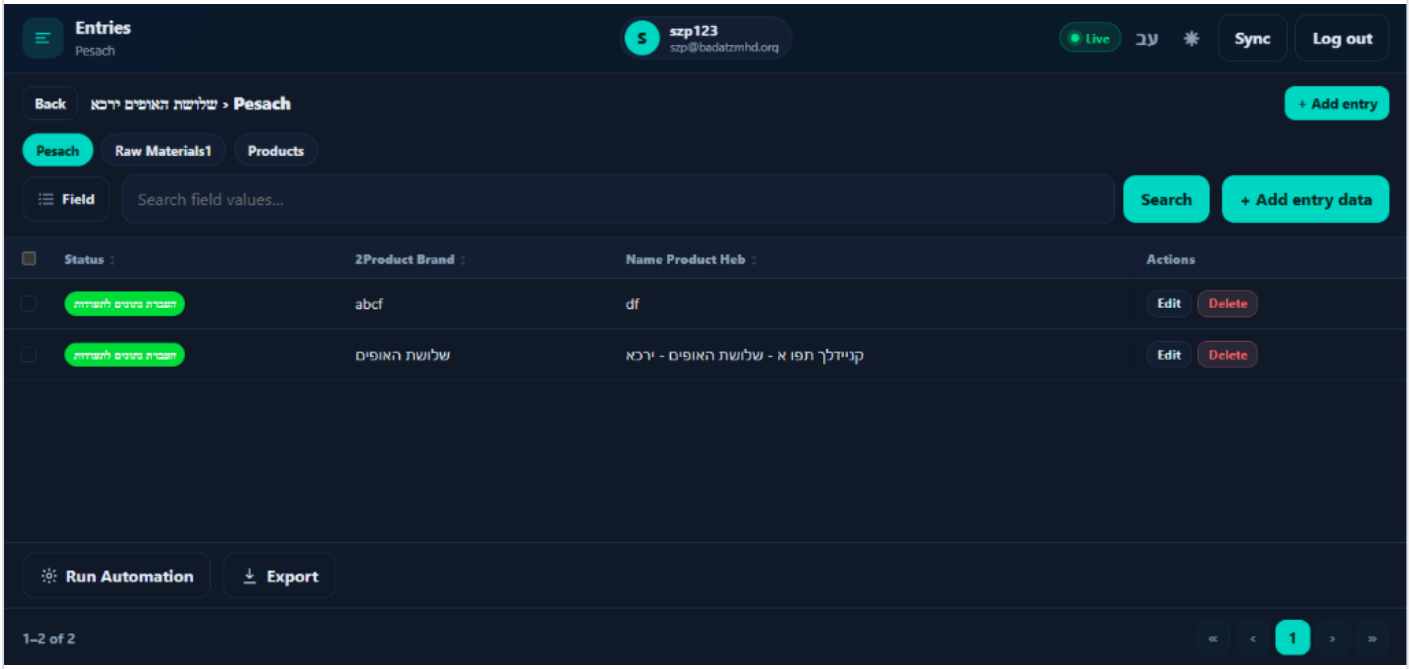
- **Bilingual Field Naming:** Configurable entry modal accommodating parallel Entry Name English and Entry Name Hebrew input fields for multi-regional corporate administration.
- **Custom Fields & Folder Taxonomy:** Modular attribute builder allowing operators to attach dynamic custom fields, folder memberships, and flexible data attributes with single-click (+) expansion.
- **Staff Allocation & Permission Toggles:** Granular governance toggles controlling header visibility (Show in header), team member copying, and dedicated entry-level staffing allocation.



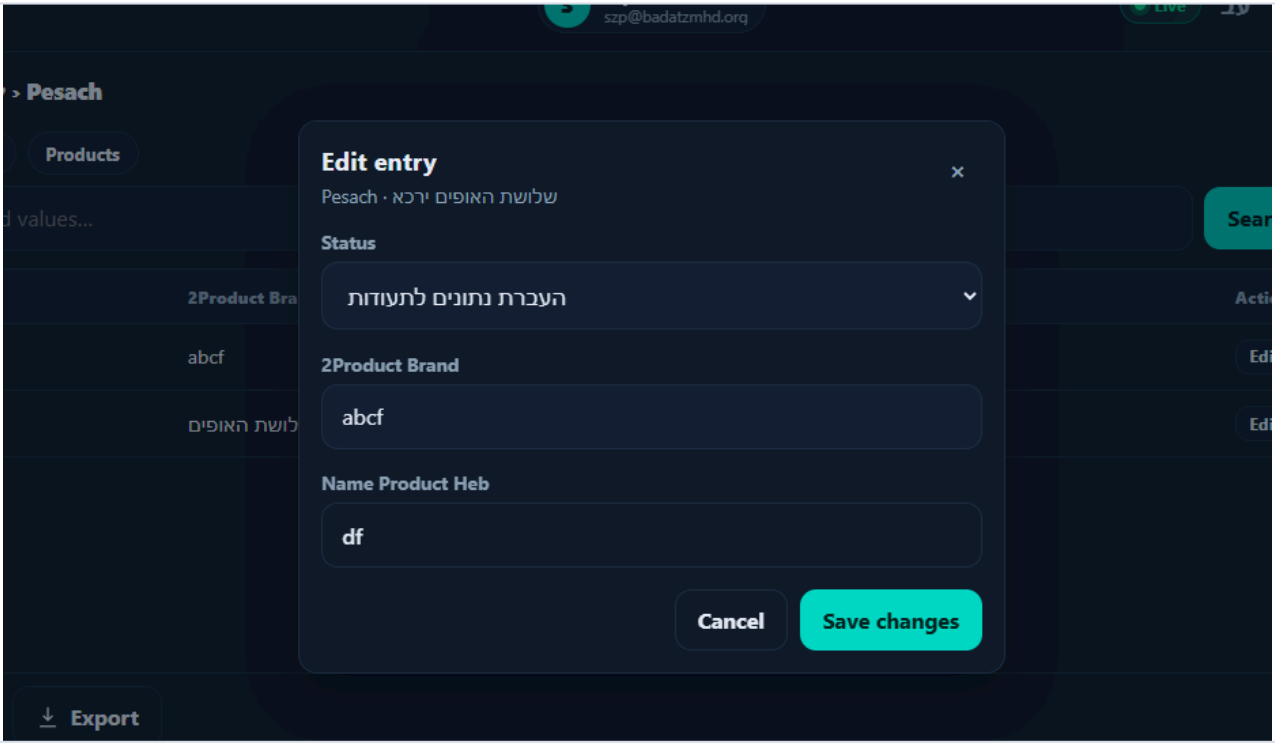
Pesach Category Compliance & Product Data Grid

DATA GRID

- **Multi-Category Tab Navigation:** Instant switching across Pesach, Raw Materials1, and Products datasets with breadcrumb navigation path and total item counter (1–2 of 2).
- **Status Highlighting & Field Querying:** Real-time status indicators (העברת נתונים לתעודות) with multi-column attribute tracking (Product Brand, Hebrew Product Name) and targeted field search.
- **Automation Triggers & Data Export:** One-click batch actions allowing operators to execute Run Automation routines, export ledger data to spreadsheet formats, and add entry data on demand.



Focused Entry Record Editor & Brand Validation

RECORD EDITOR


- **Contextual Modal Editing:** Overlay editor displaying linked client entity (שלושת האופים ירכא - Pesach) for zero-context-loss record modifications without leaving the primary grid.
- **Workflow Status Routing:** Interactive status dropdown selecting operational stages such as data certificate transfer (העברת נתונים לתעודות) with real-time audit logging.
- **Brand & Hebrew Name Specification:** Dedicated input controls for secondary product branding (abcf) and Hebrew product labeling (df) backed by Cancel and Save changes safety controls.
