Biz1 Inventory Platform Overview

Biz1 Inventory is an enterprise warehouse stock tracker and catalog management portal designed to streamline real-time inventory levels, barcode scanning, stock threshold alerts, and purchase order dispatches.

- **Warehouse Stock & Inventory Pipeline:** Centralized product catalog monitoring on-hand quantities, categorized items (e.g. PowerShell Test Product), SKU identifiers, and instant "In Stock" indicators.
- **Barcode Scanning & Quantity Adjustments:** Integrated device camera viewport button for rapid physical barcode recognition and immediate stock adjustments (Stock In / Stock Out).
- **Automated PO Generation & Multi-Filtering:** Dynamic threshold alerts for low stock levels, one-click purchase order generator for suppliers, and fast category filter tabs (All, In Stock, Low Stock, Out of Stock).

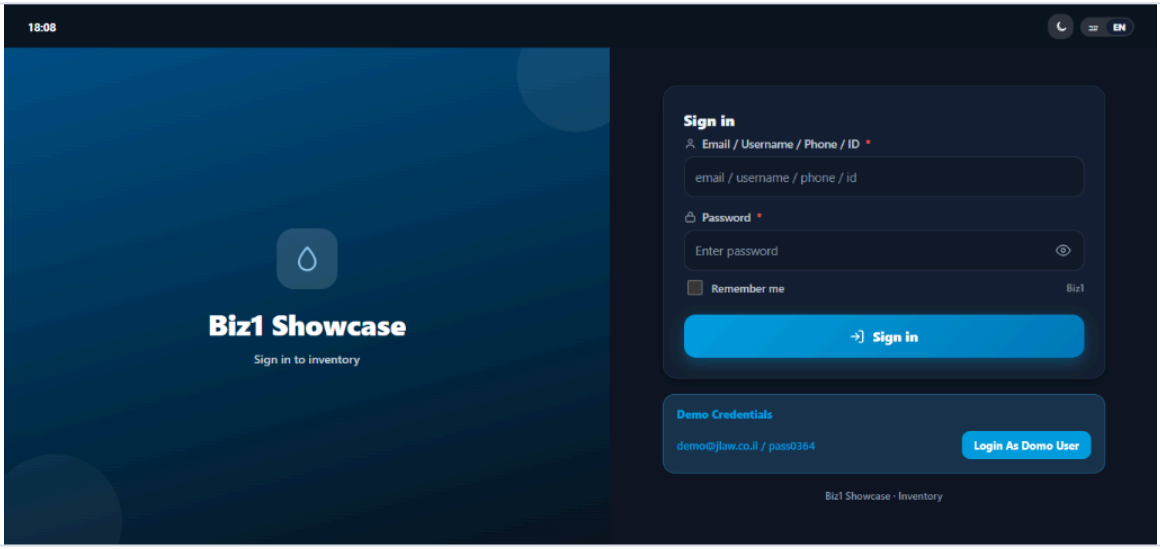
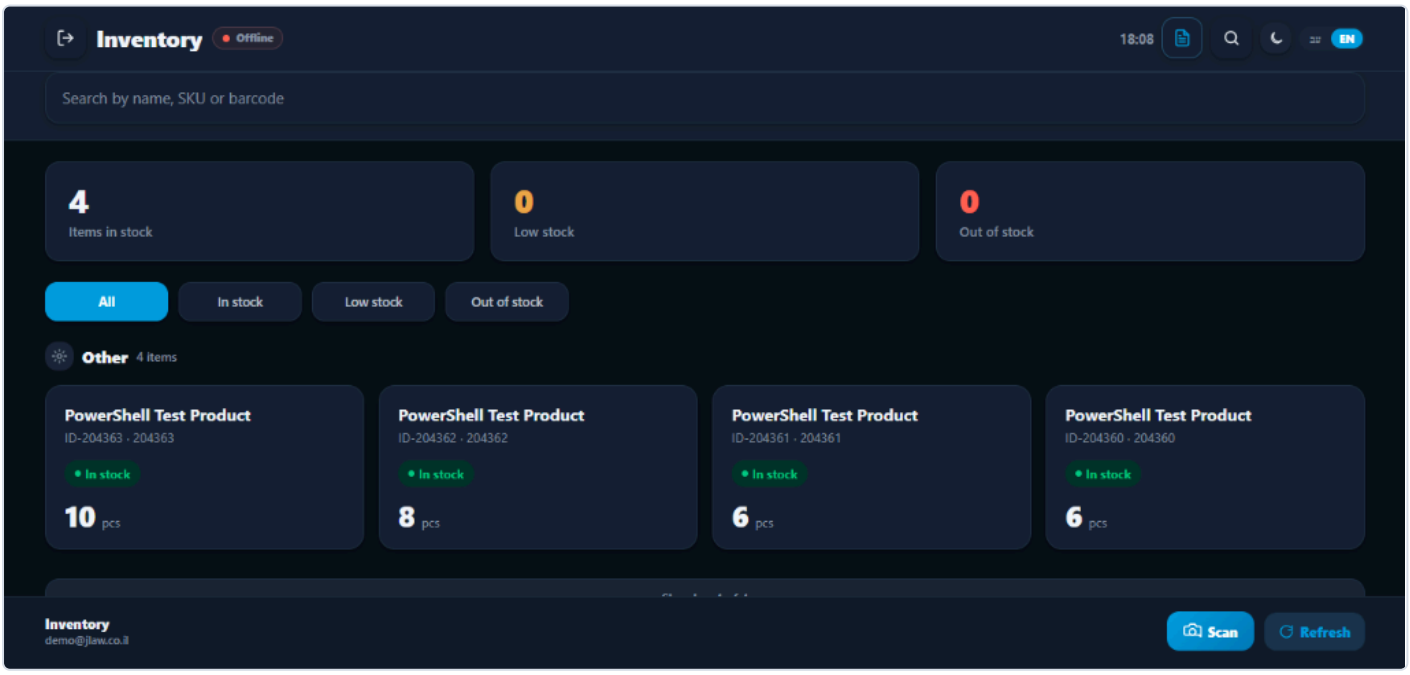
System Access Credentials · Active Test Access

Parameter / Control	Value / Format	Description & Instructions
Login Portal URL	https://apps.bull36.com/demo/inventory/	Direct web access URL to the Inventory management portal.
Login Username	`demo@jlaw.co.il`	Valid operator account identifier to authenticate into the platform.
Login Password	`pass0364`	Standard demo passkey; click password visibility toggle to view input.

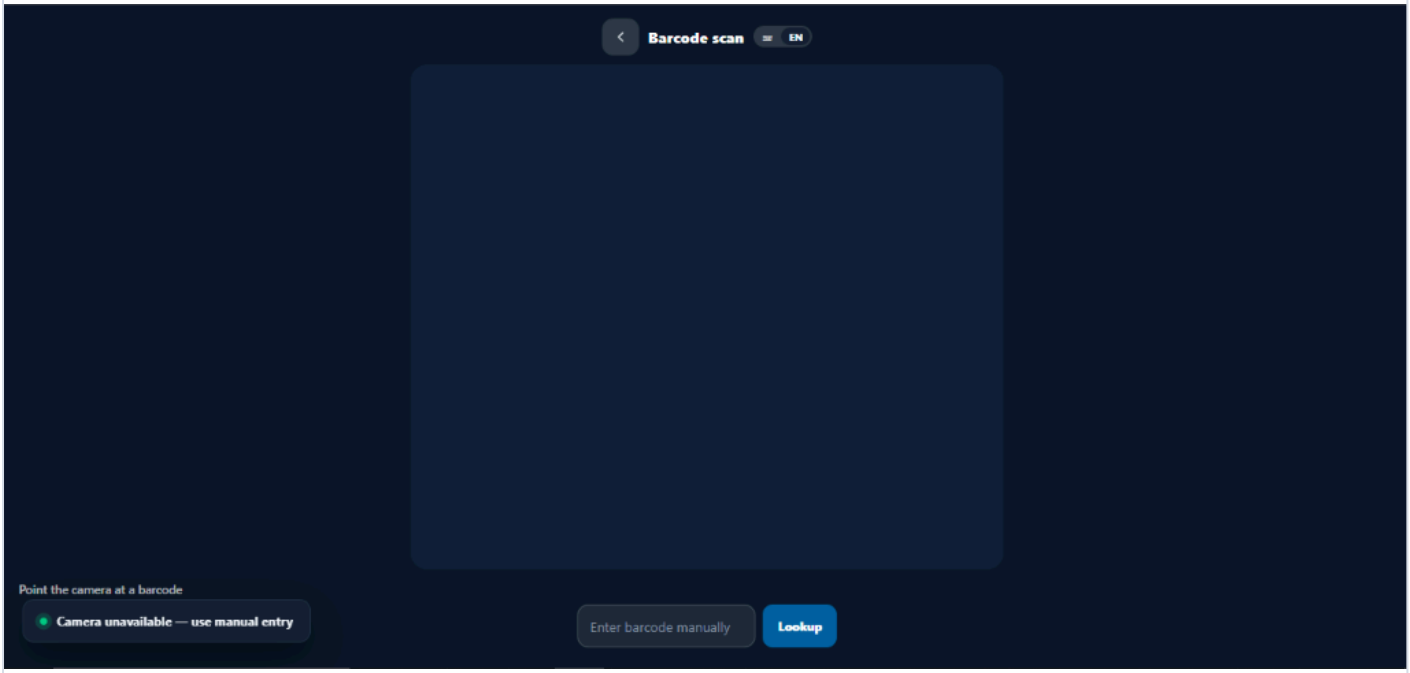




Rapid Barcode Scanner Viewport & Manual SKU Lookup

BARCODE RECOGNITION

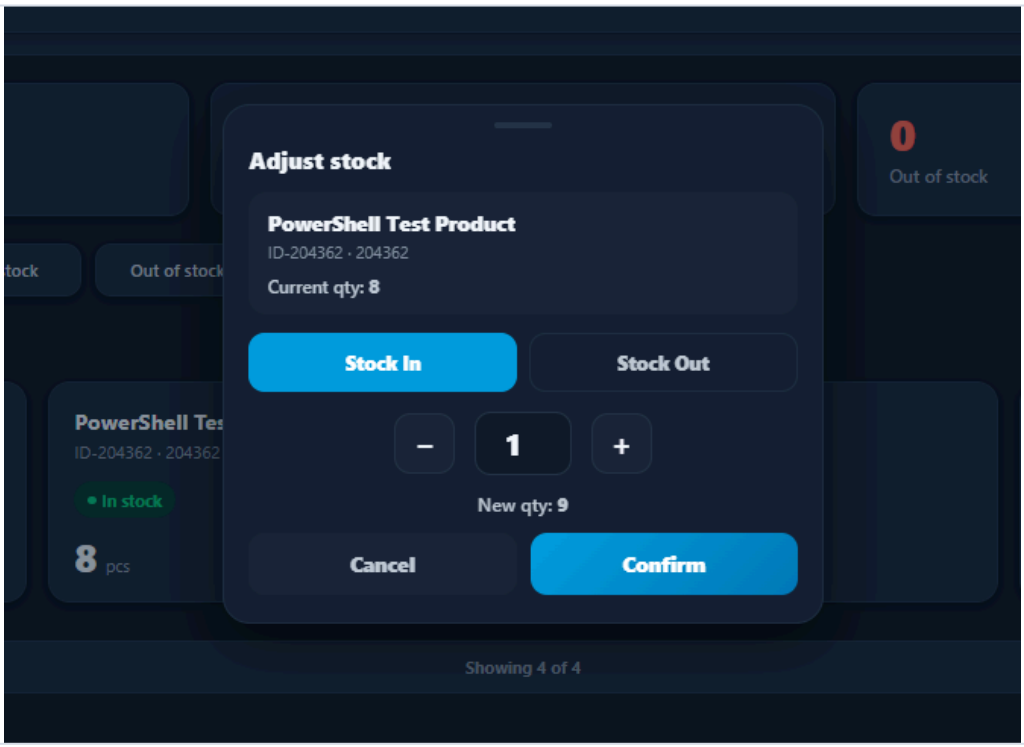
- **Hardware Camera Viewport:** Real-time optical scanner overlay capturing 1D/2D barcodes directly via mobile camera or webcam optics.
- **Fallback Manual Lookup:** Fail-safe manual entry field allowing warehouse operators to type numerical barcodes when camera optics are unavailable.
- **Instant Item Retrieval:** Single-click `Lookup` action instantly retrieving SKU metadata, current stock counts, and storage locations.



Rapid Stock Adjustment Modal & Quantity Stepper

STOCK ADJUSTMENT

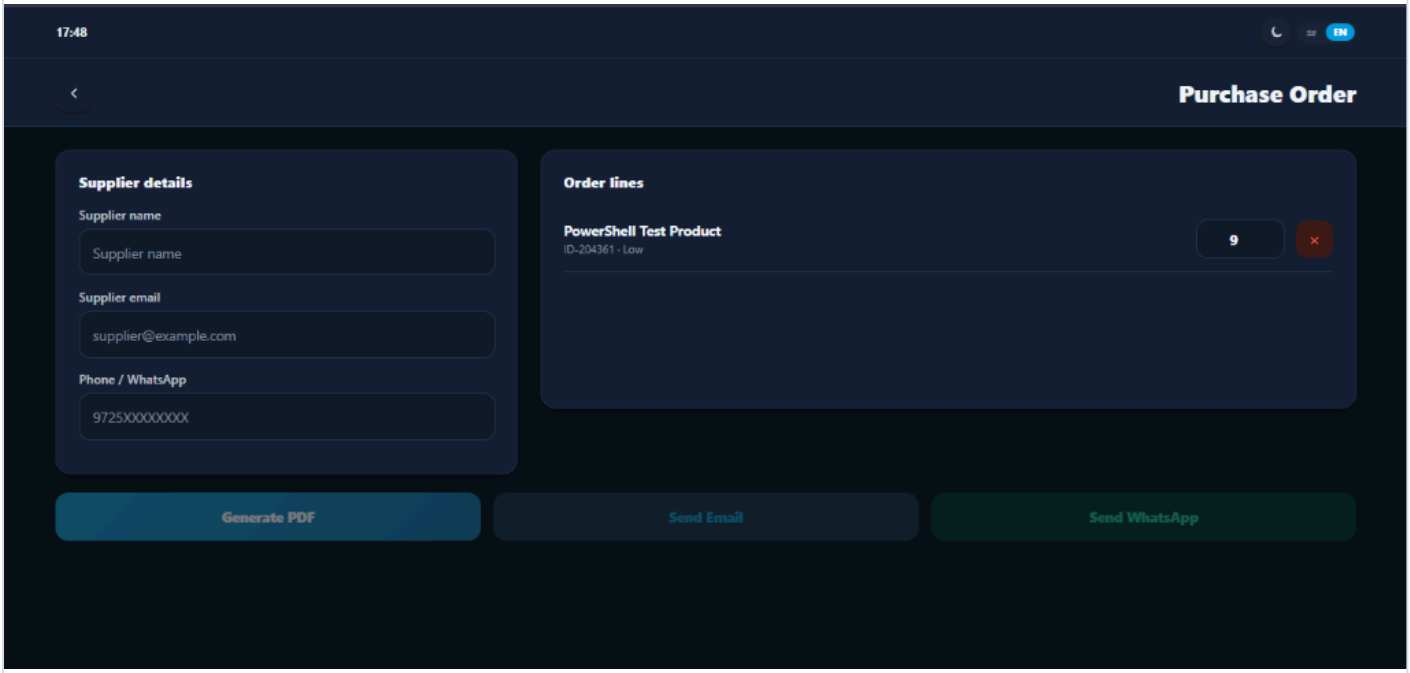
- **Dual Directional Actions:** One-touch segmented buttons toggling between receiving inventory (`Stock In`) and issuing goods (`Stock Out`).
- **Precision Quantity Stepper:** Incremental `[-]` and `[+]` controls recalculating final projected units (`New qty: 9`) in real time.
- **Item Traceability:** Clear item identification showing product description, internal reference codes (`ID-204362`), and current baseline balances.



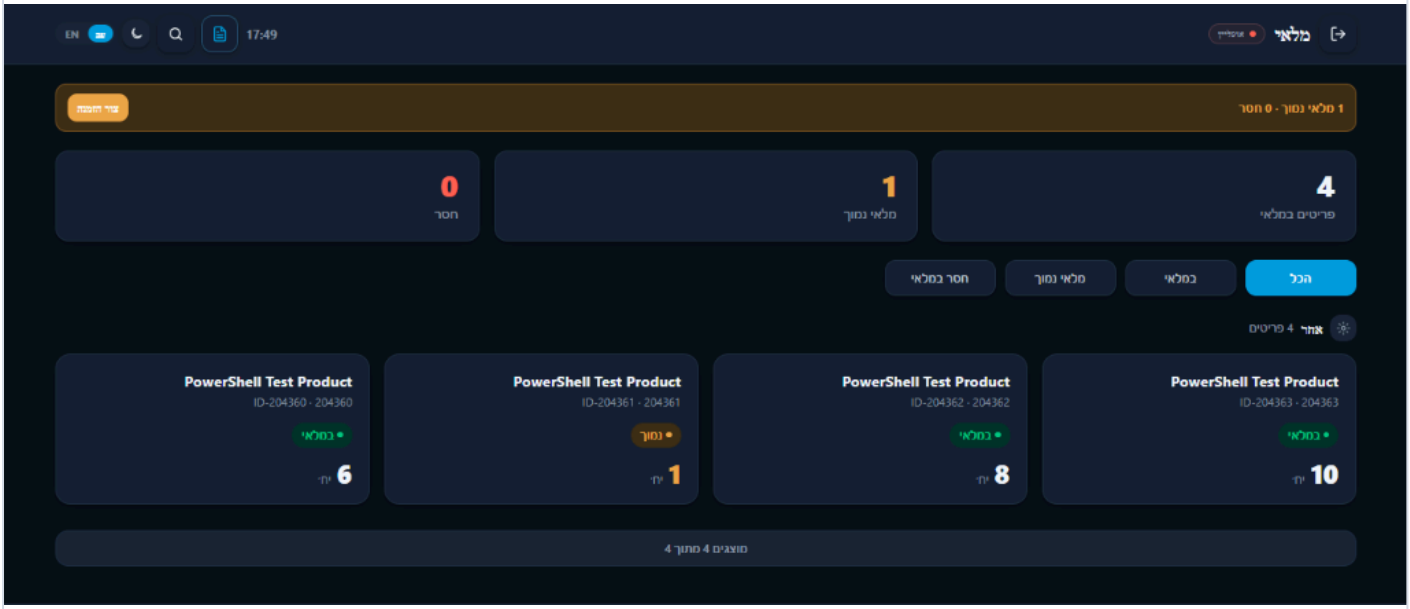
Automated Purchase Order Dispatch & Multi-Channel Output

PROCUREMENT DISPATCH

- **Vendor Information Capture:** Dedicated vendor profiling fields capturing supplier trade name, contact email address, and direct WhatsApp contact numbers.
- **Line Item Reconciliation:** Dynamic replenishment order rows displaying low-stock alerts (`ID-204361 · Low`) and order quantity adjustments.
- **Multi-Channel Dispatch:** Single-click export actions supporting official PDF generation, direct email dispatch, and instant WhatsApp procurement routing.



Native Hebrew RTL Dashboard & Stock Health Telemetry

HEBREW RTL INTERFACE


- **Hebrew RTL Alignment:** Full Right-to-Left warehouse catalog presentation adhering to native Hebrew typography and navigation (`מלאי`).
- **Threshold Alert Banner:** Prominent amber alert bar identifying low stock items (`1 מלאי נמוך`) with one-click reorder trigger (`צור הזמנה`).
- **KPI Metrics & Grid Badges:** Real-time header metrics summarizing out-of-stock (`0`), low-stock (`1`), and in-stock units (`4`) alongside unit count badges (`יח'`).
