Biz1 Orders Platform Overview

Biz1 Orders is an enterprise real-time order processing and customer ledger management platform engineered to coordinate multi-line orders, manage catalog product dispatch, streamline client billing states, and maintain team-wide synchronization.

- **Customer Order Rows Ledger:** Centralized order ledger tracking account IDs (#13038833), order dates, assigned coordinators, Hebrew institution names, pricing, and multi-action controls.
- **Multi-Parameter Filter Toolbar:** Granular query controls supporting status filtering, payment settlement states (All payments, Unpaid), custom date ranges, and full-text keyword searches.
- **Interactive Order Creation & Line Editing:** Contextual modal overlays for fast customer auto-suggest attribution, catalog product selection (מפיק - הזמנה), and automated price calculation.

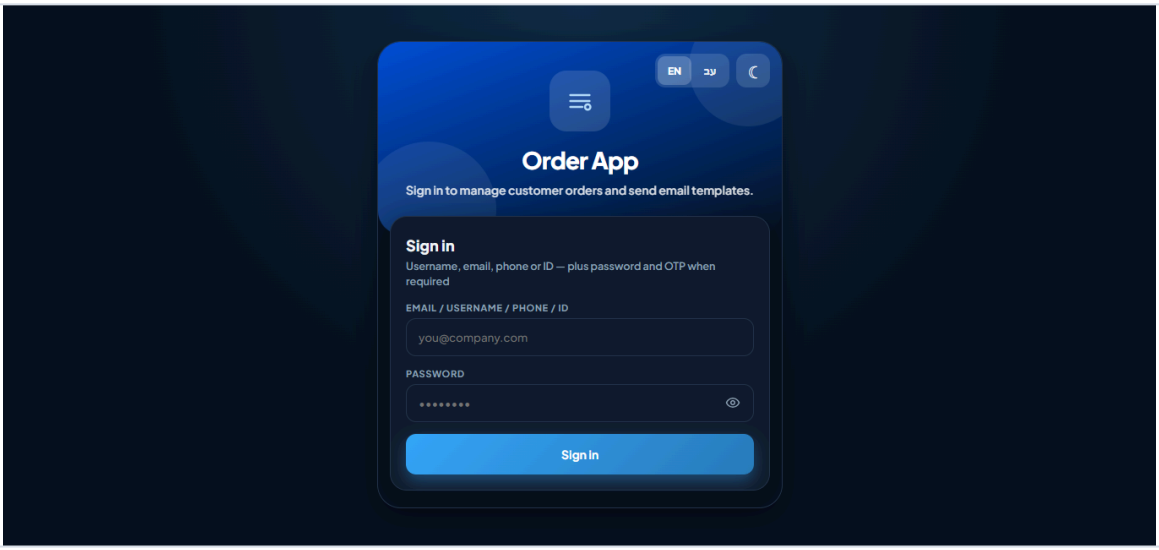
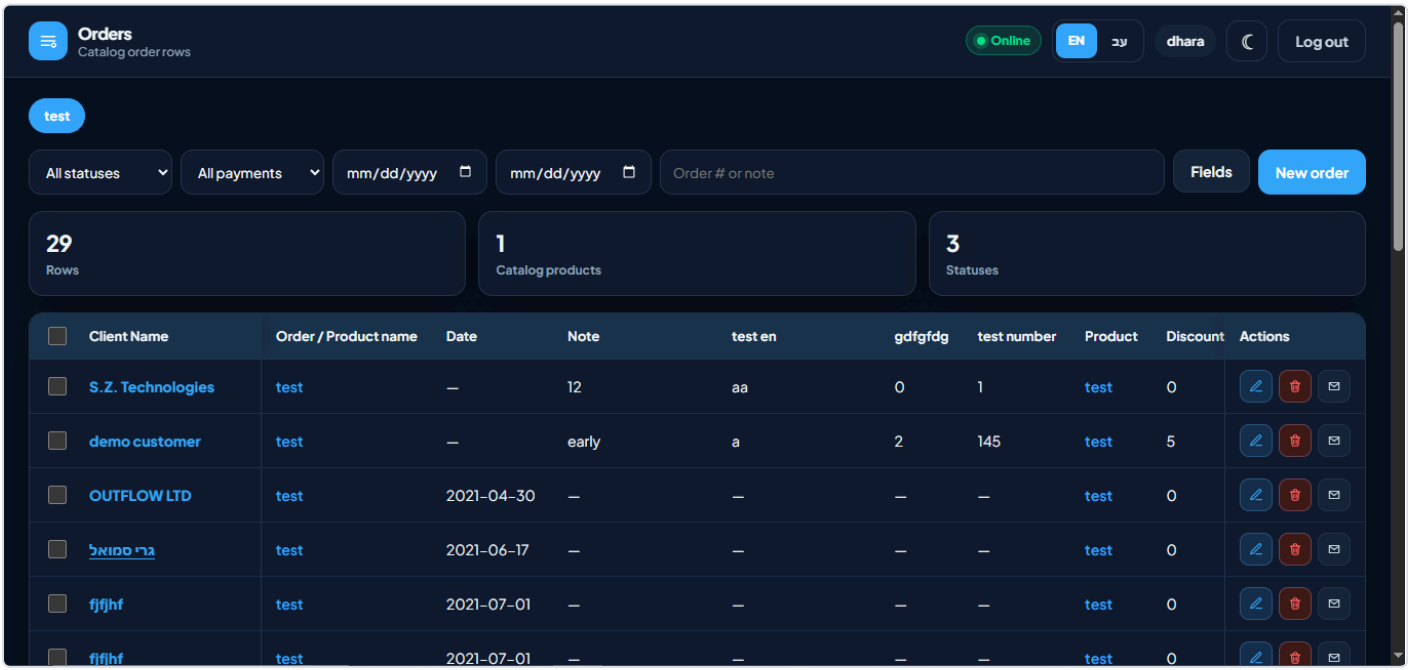
System Access Credentials · Active Test Access

Parameter / Control	Value / Format	Description & Instructions
Login Portal URL	https://apps.biz1.co.il/info/info/index.html	Direct web access URL to the Biz1 Orders login page.
Login Username	`info`	Valid operator login handle to authenticate into Biz1 Orders.
Login Password	`Hydh3AsEI7` Universal	Common password across all Biz1 platforms; case-sensitive test authentication.
Localization & Interface	`Hebrew (עב) · English (EN) · Light High-Contrast`	Multi-lingual order processing with dynamic column customizations.

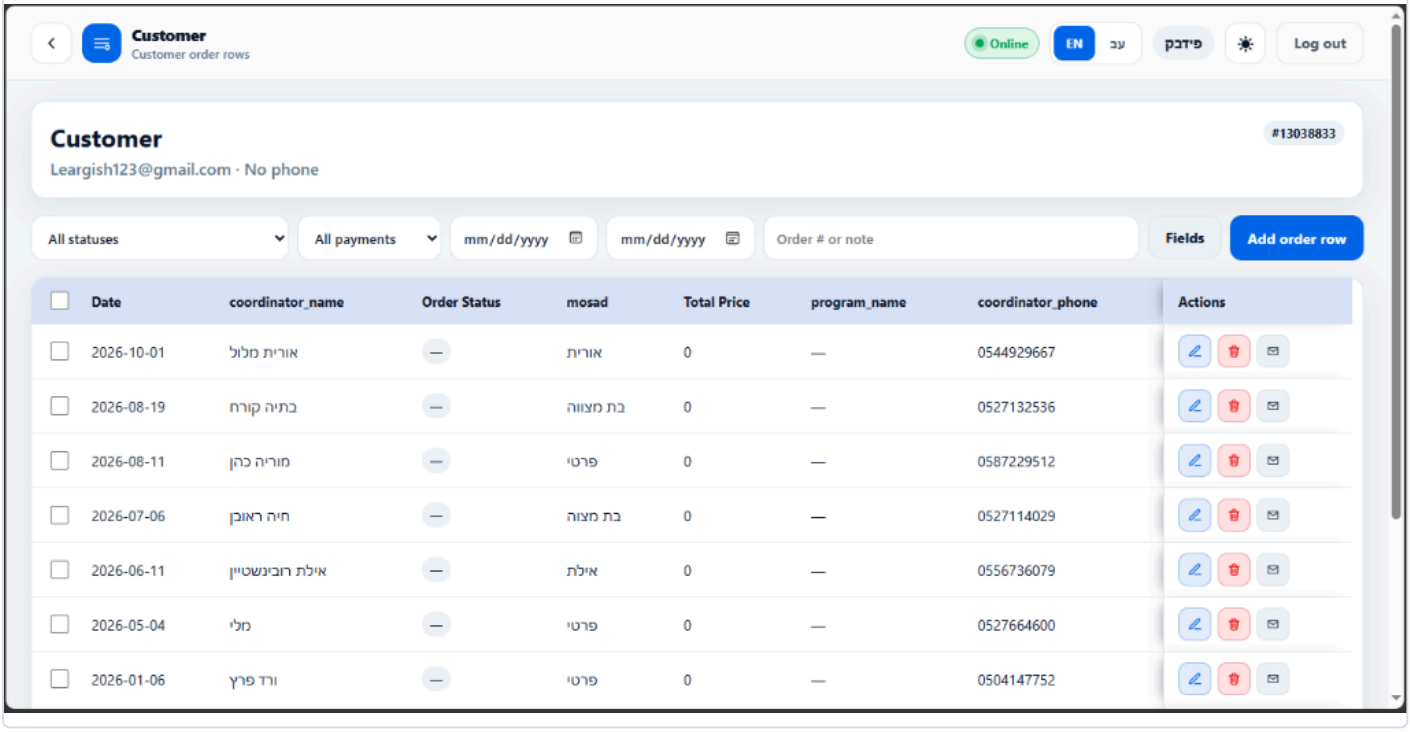




Customer Order Rows Ledger & Filter Pipeline

ORDER LEDGER

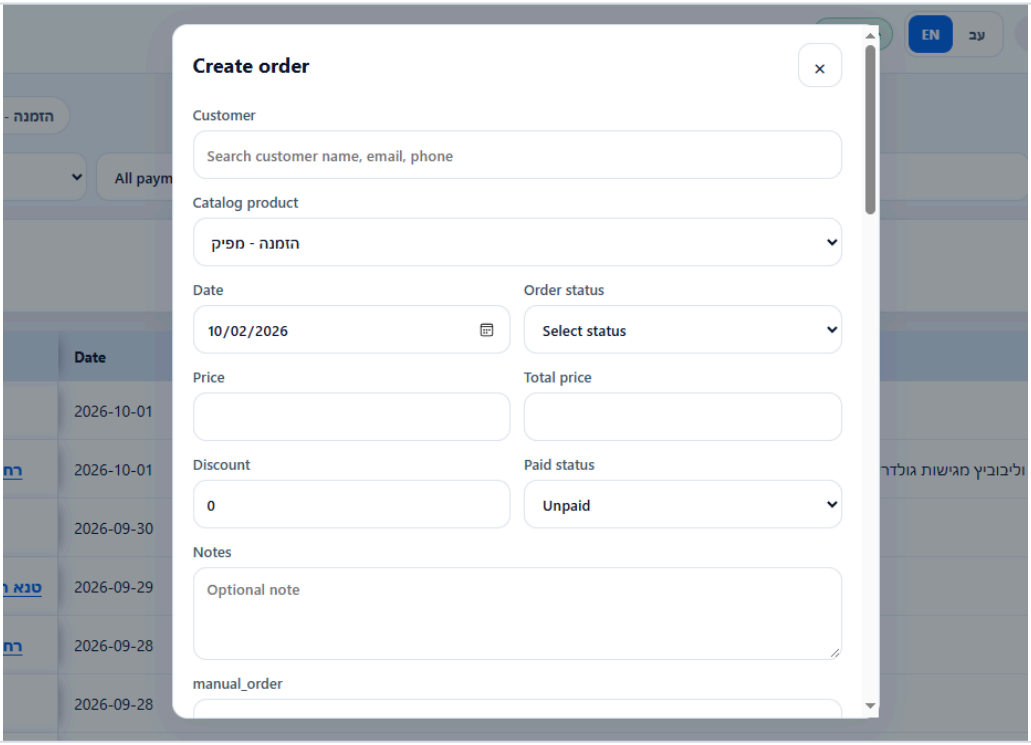
- **Dedicated Customer Account Dossier:** Comprehensive client rows ledger displaying account reference (#13038833), registered email (Leargish123@gmail.com), and live system presence.
- **Multi-Parameter Filter Toolbar:** Instant query filters by order status, payment settlement condition (All payments, Unpaid), calendar date ranges, and full-text keyword lookup.
- **Detailed Row Records & Action Hub:** Structured table logging execution dates, Hebrew coordinator names, institutional affiliations, phone numbers, and one-click Edit, Delete, or Message triggers.



Enterprise Order Generation & Customer Attribution Studio

ORDER CREATION

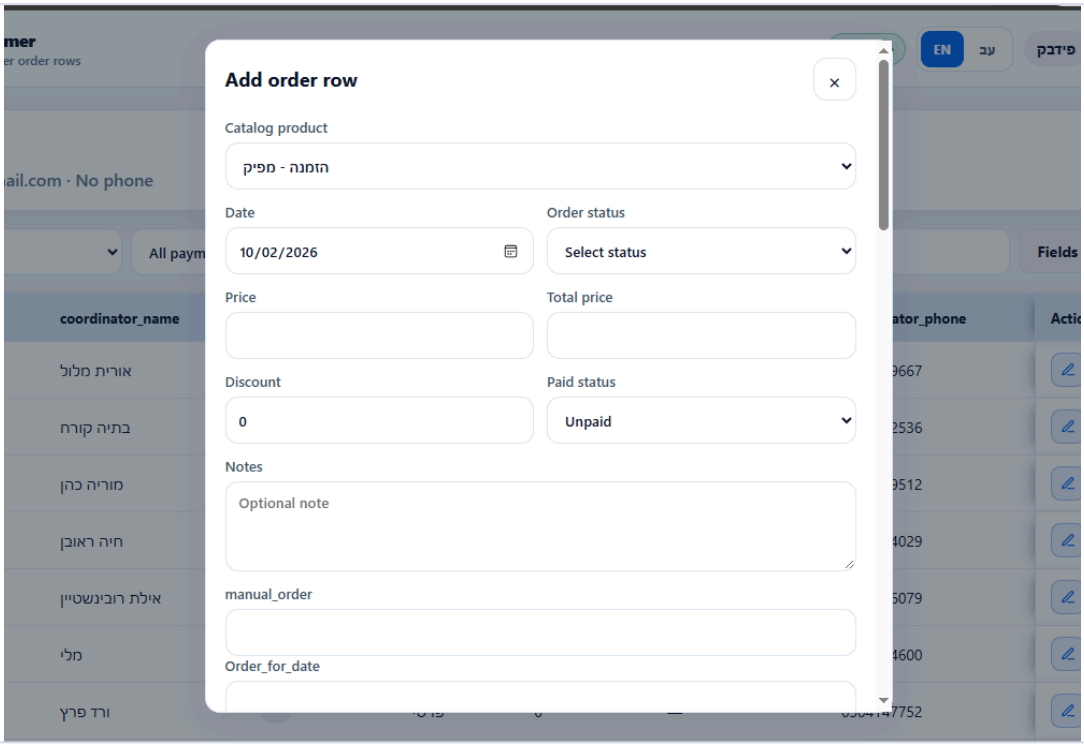
- **Intelligent Customer Auto-Suggest:** Unified lookup search querying client databases across customer name, billing email, or direct telephone handle.
- **Catalog Product Linkage:** Interactive dropdown selecting registered commercial product items such as producer order contracts (הזמנה - מפיק) with automatic taxonomy routing.
- **Commercial Terms & Scheduling:** Precision configuration of order execution dates, status pipeline stages, commercial discounts, payment status (Unpaid), and customized delivery notes.



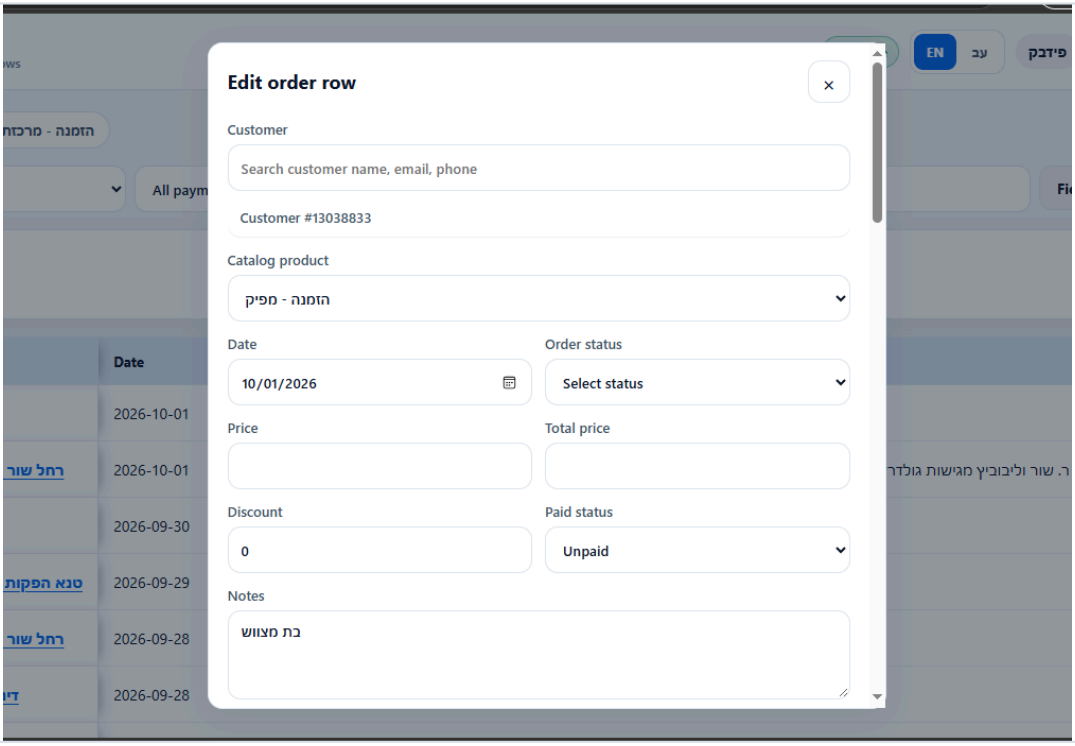
Contextual Order Row Line Item Addition

ROW DISPATCH

- **Context-Preserving Modal Dispatch:** Focused line addition dialog launching directly above the active customer ledger for seamless multi-row booking without page reloads.
- **Commercial Pricing Engine:** Dedicated input fields for line item unit price, applied volume discounts, automated total price computation, and manual order classifications.
- **Lifecycle Status & Scheduling:** Interactive order stage selectors paired with precision target calendar pickers (10/02/2026) and free-text operator instructions.



Precision Line Item Record Editor & Financial Recalculation

RECORD EDITOR


- **Audited Customer Reference Binding:** Persistent client attribution displaying customer code (#13038833) with full-text customer verification across email and phone records.
- **Contextual Event Notes & Localization:** Integrated notes editor preserving Hebrew event classifications (בת מצווש) alongside commercial delivery schedules (10/01/2026).
- **Real-Time Payment Status Reconciliation:** Immediate adjustment of settlement conditions between Paid and Unpaid states with zero-latency table updating upon save.
